

CAPABILITY STATEMENT

HillsEditor Services is an independent Maryland IT consulting practice, founded in 2002, providing custom software engineering, cloud infrastructure, and DevSecOps support to federal and commercial clients.

Core Competencies

- Software Engineering & Web Development — Python, Java, Node.js; REST API design and systems integration; Drupal and WordPress CMS development.
- Cloud & Infrastructure — AWS and Azure environment configuration, containerized deployments, Linux server hardening.
- DevSecOps & CI/CD — GitLab CI/CD, GitHub Actions, code baseline and configuration management across dev/test environments.
- Applied AI & Automation — Python-based automation, LangChain/RAG prototyping, internal tooling.

Differentiators

- Active Public Trust / MBI security clearance.
- Direct, senior-level engineering execution on every project — no account-management layers.
- Hands-on federal IT background: Accenture Federal Services (DOT), Argonne National Laboratory (DOE), U.S. Treasury contract work.

Past Performance

Surface Transportation Board (U.S. DOT) — 2024

Scope: Short-term IT modernization support engagement.

Key Personnel Experience

- Accenture Federal Services (U.S. DOT) — backend development, system troubleshooting, integration support.
- Argonne National Laboratory (U.S. DOE) — backend services and internal research systems.
- U.S. Treasury contract (via Kforce) — public-facing application support and backend updates.

Note: federal engagements above reflect the founder's personal professional experience, not prior HillsEditor Services contracts.
